“This superbly succinct and incisive book couldn’t be more timely or urgent.” —Michael Sorkin, author of *All Over the Map*

Our cities are changing. Around the world, more and more money is being invested in buildings and land. Real estate is now a \$217 trillion dollar industry, worth thirty-six times the value of all the gold ever mined. It forms sixty percent of global assets, and one of the most powerful people in the world—the president of the United States—made his name as a landlord and developer. Samuel Stein shows that this explosive transformation of urban life and politics has been driven not only by the tastes of wealthy newcomers, but by the state-driven process of urban planning. Planning agencies provide a unique window into the ways the state uses and is used by capital, and the means by which urban renovations are translated into rising real estate values and rising rents. *Capital City* explains the role of planners in the real estate state, as well as the remarkable power of planning to reclaim urban life. On a far future Earth, mankind's achievements are immense: artificially intelligent robots, genetically uplifted animals, interplanetary travel, genetic modification of the human form itself. But nothing comes without a cost. Humanity is tired, its vigour all but gone. Society is breaking down into smaller communities,

dispersing into the countryside and abandoning the great cities of the world. As the human race dwindles and declines, which of its great creations will inherit the Earth? And which will claim the stars? This true story and retrospective documents the life and times of members of The Destiny Children (TDC) graffiti crew from 1985 to 2000. From Long Island, New York, The Destiny Children/Unlimited Styled Artists commemorate the 25-year history of the crew and their impact on the New York City subway graffiti era. This large collector's book is loaded with 500 color images of original art ranging from burners on hand ball courts to pieces on tractor trailers to works throughout the New York City subway system. Works by many established NYC graffiti artists are featured, including founding members DC3 and SHO. Other original members featured are ZOO, SHOROZ, BEAVER, LAE, LAC2, ROE, DOOJ, SHIM, and ONE2. Works by affiliated writers, ZEUS TDC, CEOS, ROZ One, SHARE 37, POKE IBM, EPIC, RECK, SKETCH, KARL TCM, DEON, BOM 5 MW, SACE RIP, MIRAGE RIP, and others are documented. Alongside the visual accounts of these artistic exploits are dozens of true stories and recollections that uncover the reality of painting in yards, lay ups, racking spray paint, fights, graffiti beefs, and police raids. See what made TDC take extraordinary risks so their street art could be seen by the public in their never-ending quest for fame. An ideal history for artists, art historians, street art enthusiasts, anthropologists, and urban dwellers. NEW YORK TIMES NOTABLE BOOK • “Breathtaking . . . a remarkable blend of murder mystery, love story, political intrigue, and tragedy of manners.”—USA Today

The year is 1901. Buffalo, New York, is poised for glory. With its booming industry and newly electrified streets, Buffalo is a model for the century just beginning. Louisa Barrett has made this dazzling city her home. Headmistress of Buffalo’s most prestigious school, Louisa is at ease in a world of men, protected by the titans of her city. But nothing prepares her for a startling discovery: evidence of a murder tied to the city’s cathedral-like power plant at nearby Niagara Falls. This shocking crime—followed by another mysterious death—will ignite an explosive chain of events. For in this city of seething intrigue and dazzling progress, a battle rages among politicians, power brokers, and industrialists for control of Niagara. And one extraordinary woman in their midst must protect a dark secret that implicates them all. . . .

Feminist City is an ongoing experiment in living differently, living better, and living more justly in an urban world. We live in the city of men. Our public spaces are not designed for female bodies. There is little consideration for women as mothers, workers or carers. The urban streets often are a place of threats rather than community. Gentrification has made the everyday lives of women even more difficult. What would a metropolis for working women look like? A city of friendships beyond Sex and the City. A transit system that accommodates mothers with strollers on the school run. A public space with enough

toilets. A place where women can walk without harassment. In *Feminist City*, through history, personal experience and popular culture Leslie Kern exposes what is hidden in plain sight: the social inequalities built into our cities, homes, and neighborhoods. Kern offers an alternative vision of the feminist city. Taking on fear, motherhood, friendship, activism, and the joys and perils of being alone, Kern maps the city from new vantage points, laying out an intersectional feminist approach to urban histories and proposes that the city is perhaps also our best hope for shaping a new urban future. It is time to dismantle what we take for granted about cities and to ask how we can build more just, sustainable, and women-friendly cities together. Imagine waking up to the gentle noises of the city, and moving through your day with complete confidence that you will get where you need to go quickly and efficiently. *Soft City* is about ease and comfort, where density has a human dimension, adapting to our ever-changing needs, nurturing relationships, and accommodating the pleasures of everyday life. How do we move from the current reality in most cities—separated uses and lengthy commutes in single-occupancy vehicles that drain human, environmental, and community resources—to support a soft city approach? In *Soft City* David Sim, partner and creative director at Gehl, shows how this is possible, presenting ideas and graphic examples from around the globe. He draws from his vast design experience to make a case for a dense and diverse built environment at a human scale, which he presents through a series of observations of older and newer places, and a range of simple built phenomena, some traditional and some totally new inventions. Sim shows that increasing density is not enough. The soft city must consider the organization and layout of the built environment for more fluid movement and comfort, a diversity of building types, and thoughtful design to ensure a sustainable urban environment and society. *Soft City* begins with the big ideas of happiness and quality of life, and then shows how they are tied to the way we live. The heart of the book is highly visual and shows the building blocks for neighborhoods: building types and their organization and orientation; how we can get along as we get around a city; and living with the weather. As every citizen deals with the reality of a changing climate, *Soft City* explores how the built environment can adapt and respond. *Soft City* offers inspiration, ideas, and guidance for anyone interested in city building. Sim shows how to make any city more efficient, more livable, and better connected to the environment. An electrifying story of the sensational murder trial that divided a city and ignited the civil rights struggle In 1925, Detroit was a smoky swirl of jazz and speakeasies, assembly lines and fistfights. The advent of automobiles had brought workers from around the globe to compete for manufacturing jobs, and tensions often flared with the KKK in ascendance and violence rising. Ossian Sweet, a proud Negro doctor-grandson of a slave-had made the long climb from the

ghetto to a home of his own in a previously all-white neighborhood. Yet just after his arrival, a mob gathered outside his house; suddenly, shots rang out: Sweet, or one of his defenders, had accidentally killed one of the whites threatening their lives and homes. And so it began—a chain of events that brought America's greatest attorney, Clarence Darrow, into the fray and transformed Sweet into a controversial symbol of equality. Historian Kevin Boyle weaves the police investigation and courtroom drama of Sweet's murder trial into an unforgettable tapestry of narrative history that documents the volatile America of the 1920s and movingly re-creates the Sweet family's journey from slavery through the Great Migration to the middle class. Ossian Sweet's story, so richly and poignantly captured here, is an epic tale of one man trapped by the battles of his era's changing times. *Arc of Justice* is the winner of the 2004 National Book Award for Nonfiction. A beautifully designed guidebook to the unnoticed yet essential elements of our cities, from the creators of the wildly popular 99% Invisible podcast *In The Divided City*, urban practitioner and scholar Alan Mallach presents a detailed picture of what has happened over the past 15 to 20 years in industrial cities like Pittsburgh and Baltimore, as they have undergone unprecedented, unexpected revival. He spotlights these changes while placing them in their larger economic, social and political context. Most importantly, he explores the pervasive significance of race in American cities, and looks closely at the successes and failures of city governments, nonprofit entities, and citizens as they have tried to address the challenges of change. *The Divided City* concludes with strategies to foster greater equality and opportunity, firmly grounding them in the cities' economic and political realities. Monumental in scope and vividly detailed, *Chocolate City* tells the tumultuous, four-century story of race and democracy in our nation's capital. Emblematic of the ongoing tensions between America's expansive democratic promises and its enduring racial realities, Washington often has served as a national battleground for contentious issues, including slavery, segregation, civil rights, the drug war, and gentrification. But D.C. is more than just a seat of government, and authors Chris Myers Asch and George Derek Musgrove also highlight the city's rich history of local activism as Washingtonians of all races have struggled to make their voices heard in an undemocratic city where residents lack full political rights. Tracing D.C.'s massive transformations—from a sparsely inhabited plantation society into a diverse metropolis, from a center of the slave trade to the nation's first black-majority city, from "Chocolate City" to "Latte City"—Asch and Musgrove offer an engaging narrative peppered with unforgettable characters, a history of deep racial division but also one of hope, resilience, and interracial cooperation. First there was downtown. Then there were suburbs. Then there were malls. Then Americans launched the most sweeping change in 100 years in how they live, work, and play. The Edge

City. Imagine a bus system that is fast, frequent, and reliable--what would that change about your city? Buses can and should be the cornerstone of urban transportation. They offer affordable mobility and can connect citizens with every aspect of their lives. But in the US, they have long been an afterthought in budgeting and planning. Transit expert Steven Higashide uses real-world stories of reform to show us what a successful bus system looks like. Higashide explains how to marshal the public in support of better buses and argues that better bus systems will create better cities for all citizens. With a compelling narrative and actionable steps, *Better Buses, Better Cities* describes how decision-makers, philanthropists, activists, and public agency leaders can work together to make the bus a win in any city. Revising conventional wisdom about the Klan, Mr. Jackson shows that its roots in the 1920s can also be found in the burgeoning cities. "Comprehensively researched, methodically organized, lucidly written...a book to be respected."--*Journal of American History*. In this nuanced and groundbreaking history, Donna Murch argues that the Black Panther Party (BPP) started with a study group. Drawing on oral history and untapped archival sources, she explains how a relatively small city with a recent history of African A funny, transporting, surprising, and poignant novel that was one of the highest-selling debuts of recent years in Korea, *Love in the Big City* tells the story of a young gay man searching for happiness in the lonely city of Seoul. *Love in the Big City* is the English-language debut of Sang Young Park, one of Korea's most exciting young writers. A runaway bestseller, the novel hit the top five lists of all the major bookstores, went into twenty-six printings, and was praised for its unique literary voice and perspective. It is now poised to capture a worldwide readership. Young is a cynical yet fun-loving Korean student who pinballs from home to class to the beds of recent Tinder matches. He and Jaehee, his female best friend and roommate, frequent nearby bars where they push away their anxieties about their love lives, families, and money with rounds of soju and ice-cold Marlboro Reds that they keep in their freezer. Yet over time, even Jaehee leaves Young to settle down, leaving him alone to care for his ailing mother and to find companionship in his relationships with a series of men, including one whose handsomeness is matched by his coldness, and another who might end up being the great love of his life. A brilliantly written novel that takes us into the glittering nighttime of Seoul and the bleary-eyed morning after with both humor and emotion, *Love in the Big City* is a wry portrait of millennial loneliness as well as the abundant joys of queer life. The ULTIMATE edition of *Sin City* for your library! An oversized gallery hardcover edition, measuring 15" wide by 21.5" tall, Frank Miller's *Sin City: The Hard Goodbye* Curator's Collection showcases the entire Eisner-winning graphic novel scanned from the original artwork in Frank Miller's archives and reproduced at the full actual size at which he originally drew it.

With an introduction by Robert Rodriguez, an afterword by Mike Richardson and an interview about the artistic process with Frank Miller! This Curator's Collection includes: The Sin City chapters from Dark Horse Presents issues #51 to #62 and the Dark Horse Presents: 5th Anniversary Special, previously collected in TR and HC as Sin City: The Hard Goodbye. This is the first volume in Kitchen Sink Books' Curator's Collection series, featuring acclaimed graphic novels reproduced from the original art, shown alongside text pieces, unseen artwork, and ancillary material. Frank Miller is arguably the most important cartoonist (writer AND artist) working in comics over the last 25 years. Mr. Miller is back in the spotlight with the release of DC's Dark Knight III: The Master Race in late 2015. Frank Miller's Sin City: The Hard Goodbye Curator's Collection includes the entire Eisner Award-winning graphic novel, now scanned from the original artwork in Frank Miller's personal archives and reproduced at the actual size he originally drew it. Twenty-five years after its first publication in the pages of Dark Horse Presents, get ready to experience one of the most groundbreaking graphic novels of all time as few have ever seen it! "Miller [is] the most important comic book artist of the last 25 years." -Los Angeles Times In a near-future New York City in which both global warming and a tremendous economic divide are making the city unlivable for many, a huge superstorm hits, leaving behind only those who had nowhere else to go and no way to get out. Makayla is a twenty-four-year-old woman who works at the convenience store chain that's taken over the city. Jesse, an eighteen-year-old, genderqueer, anarchist punk lives in an abandoned IRT station in the Bronx. Their paths cross in the aftermath of the storm when they, along with others devastated by the loss of their homes, carve out a small sanctuary in an abandoned luxury condo. In an attempt to bring hope to those who feel forsaken, an unnamed, mysterious street artist begins graffitizing colorful murals along the sides of buildings. But the castaways of the storm aren't the only ones who find beauty in the art. When the media begins broadcasting the emergence of the murals and one appears on the building Makayla, Jesse, and their friends are living in, it is only a matter of time before those who own the building come back to claim what is theirs. All City is more than a novel, it's a foreshadowing of the world to come. Toni Bentley, a dancer for George Balanchine, the greatest ballet maker of the 20th century, tells the story of Serenade, his iconic masterpiece, and what it was like to dance—and live—in his world at New York City Ballet during its legendary era. "Reading Bentley's Serenade made me feel as alive as I felt on the stage the moment that I fell in love with ballet.... [A] delicate balance of personal memoir, rarefied elegance, history of the arts and pure human interest."—Misty Copeland, New York Times Book Review "[A] unique document about one of the greatest ballets ever created.... A beautiful read"—Mikhail Baryshnikov At age seventeen, Toni Bentley was chosen by

Balanchine, then in his final years, to join the New York City Ballet. From both backstage and onstage, she carries us through the serendipitous history and physical intricacies and demands of *Serenade*: its dazzling opening, with seventeen women in a double-diamond pattern; its radical, even jazzy, use of the highly refined language that is ballet; its place in the choreographer's own dramatic story of his immigration to the United States from Soviet Russia; its mystical—and literal—embodiment of the tradition of classical ballet in just thirty-three minutes. Bentley takes us inside the rarefied, intense, and thrilling world Balanchine created through his lifelong devotion to celebrating and expanding female beauty and strength—a world that, inevitably, passed upon his death. An intimate elegy to grace and loss and to the imprint of a towering artist and his transcendent creation on Bentley's own life, *Serenade: A Balanchine Story* is a rich narrative by a dynamic artist about the nature of art itself at its most ephemeral and glorious. "Siena: City of Secrets" is a charming, intimate portrait of this most secretive of cities, often overlooked by travelers to Italy. Part cultural history and intellectual memoir, part travelogue and guide book, Tylus writes with a novelist's flair, taking the reader on a quest of discovery through the well- and not-so-well-travelled roads and alleys of the ancient city. Today, Siena can appear on the surface standoffish, a bit static, and very old-fashioned, especially when compared to its larger, flashier cousins Roma and Firenze. But first impressions wear away as we learn from Tylus that Siena was, over the long view, an innovator among the cities of Italy: the first to pave its streets and main plaza (1298), the first to publicly fund its university (1321), the first to employ the promissory note (1720), the first to ban automobile traffic from its city center (1965), and much else. We also hear about Siena's great artistic and architectural past, hidden behind centuries of over painting and rebuilding, and about its resident apocryphal and not-so-apocryphal Saints. And about the distinctive characters of its different neighborhoods (contrade), exemplified in the highly competitive horserace that takes place annually in the city and that serves as both a dividing and a uniting force for the Sieneze. Throughout we are guided by the assuring voice of a seasoned scholar with a gift for spinning a good story and with an eye for the telling detail, whether we are traveling Siena's modern highways or digging through ancient Etruscan tombs; or shadowing the path walked by medieval pilgrims; or tracking the city's financial history from its beginnings as the once-great center for commerce in the sixteenth century to its near collapse in January 2013; or celebrating literary giants Dante and Calvino or giants of the arena, Siena's Serie A soccer team. A useful and entertaining guide for students of Italian culture (Tylus has written discursive, reader-friendly endnotes and included a full bibliography in the back matter), the book will also appeal to the traveler and tourist (virtual or otherwise) interested in learning more about this

ancient, mysterious, reclusive city despite itself." From Los Angeles to Boston and Chicago to Miami, US cities are struggling to address the twin crises of high housing costs and household instability. Debates over the appropriate course of action have been defined by two poles: building more housing or enacting stronger tenant protections. These options are often treated as mutually exclusive, with support for one implying opposition to the other. Shane Phillips believes that effectively tackling the housing crisis requires that cities support both tenant protections and housing abundance. He offers readers more than 50 policy recommendations, beginning with a set of principles and general recommendations that should apply to all housing policy. The remaining recommendations are organized by what he calls the Three S's of Supply, Stability, and Subsidy. Phillips makes a moral and economic case for why each is essential and recommendations for making them work together. There is no single solution to the housing crisis—it will require a comprehensive approach backed by strong, diverse coalitions. The Affordable City is an essential tool for professionals and advocates working to improve affordability and increase community resilience through local action. *I Speak of the City* is the most extensive collection of poems ever assembled about New York. Beginning with an early piece by Jacob Steendam (from when the city was called New Amsterdam) and continuing through poems written in the aftermath of 9/11, this anthology features voices from more than a dozen countries. It includes two Nobel Prize recipients, fifteen Pulitzer Prize winners, and many other recognizable names, but it also preserves the work of long-neglected poets who celebrate the wild possibilities and colossal achievements of this epic city. Poets capture New York's major moments and transformations, writing of Hudson's arrival, Stuyvesant's prejudice, and the city's astonishing growth and gentrification. They speak of the thrills of a skyscraper's observation deck and the privations of teeming tenements. They portray the immigrant experience at Ellis Island and the decay, fear, and unexpected kindness on a subway ride. They take place on sidewalks, bridges, and docks; in taxis, buses, and ferries; and even within nature. The Brooklyn Bridge, Times Square, Broadway, the Statue of Liberty, and other familiar landmarks are recast through the prism of individual experience yet still reflect the seeming invincibility of New York and its status as a cultural magnet for the freethinking and experimental. While certain subjects and themes can be found in all urban verse, poems about New York have their own restless rhythm and ever-changing style, much like the city itself. Whether writing sonnets, epics, or experimental or imagistic verse, each of these poets has been inspired by the marvels and madness, humor and heartbreak of an enduring city. There is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. This roving cultural history of urban loneliness centers on the ultimate city: Manhattan, that

teeming island of gneiss, concrete, and glass. How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Laing travels deep into the work and lives of some of the century's most original artists in a celebration of the state of loneliness. New York is a city of superlatives. It has the largest population, greatest wealth, broadest diversity and most elegant museums in the nation. With that comes an amazing history. This tour of the Big Apple goes beyond the traditional guidebook to offer visitors and residents alike a chance to walk back in time along the streets of Manhattan. George Washington took his first oath of office on the steps of Federal Hall. Visitors can still dine at the famed Fraunces Tavern and worship at historic St. Paul's Chapel. From the Brooklyn Bridge to stunning skyscrapers, the city celebrates its own history and that of the nation. Join author Alison Fortier as she traces the history and heritage of America's largest metropolis. This charming book depicting city life includes 46 illustrations packed with taxis, trolleys, and traffic jams, along with street vendors, dog walkers, store window displays, and much more. Colorists can achieve realistic effects with the help of lightly printed numbers that correspond to a simple color key. Pages are perforated and printed on one side only for easy removal and display. Specially designed for experienced colorists, City Sights Color by Number and other Creative Haven® adult coloring books offer an escape to a world of inspiration and artistic fulfillment. Each title is also an effective and fun-filled way to relax and reduce stress. A globe-trotting, eye-opening exploration of how cities can—and do—make us happier people Charles Montgomery's Happy City will revolutionize the way we think about urban life. After decades of unchecked sprawl, more people than ever are moving back to the city. Dense urban living has been prescribed as a panacea for the environmental and resource crises of our time. But is it better or worse for our happiness? Are subways, sidewalks, and tower dwelling an improvement on the car-dependence of sprawl? The award-winning journalist Charles Montgomery finds answers to such questions at the intersection between urban design and the emerging science of happiness, and during an exhilarating journey through some of the world's most dynamic cities. He meets the visionary mayor who introduced a "sexy" lipstick-red bus to ease status anxiety in Bogotá; the architect who brought the lessons of medieval Tuscan hill towns to modern-day New York City; the activist who turned Paris's urban freeways into beaches; and an army of American suburbanites who have transformed their lives by hacking the design of their streets and neighborhoods. Full of rich historical detail and new insights from psychologists and Montgomery's own urban experiments, Happy City is an essential tool for understanding and improving our own communities. The message is as surprising as it is hopeful: by retrofitting our

cities for happiness, we can tackle the urgent challenges of our age. The happy city, the green city, and the low-carbon city are the same place, and we can all help build it. Amazon's Best Biographies and Memoirs of the Year List A moving celebration of what Bill Hayes calls "the evanescent, the eavesdropped, the unexpected" of life in New York City, and an intimate glimpse of his relationship with the late Oliver Sacks. "A beautifully written once-in-a-lifetime book, about love, about life, soul, and the wonderful loving genius Oliver Sacks, and New York, and laughter and all of creation."--Anne Lamott

Bill Hayes came to New York City in 2009 with a one-way ticket and only the vaguest idea of how he would get by. But, at forty-eight years old, having spent decades in San Francisco, he craved change. Grieving over the death of his partner, he quickly discovered the profound consolations of the city's incessant rhythms, the sight of the Empire State Building against the night sky, and New Yorkers themselves, kindred souls that Hayes, a lifelong insomniac, encountered on late-night strolls with his camera. And he unexpectedly fell in love again, with his friend and neighbor, the writer and neurologist Oliver Sacks, whose exuberance--"I don't so much fear death as I do wasting life," he tells Hayes early on--is captured in funny and touching vignettes throughout. What emerges is a portrait of Sacks at his most personal and endearing, from falling in love for the first time at age seventy-five to facing illness and death (Sacks died of cancer in August 2015). *Insomniac City* is both a meditation on grief and a celebration of life. Filled with Hayes's distinctive street photos of everyday New Yorkers, the book is a love song to the city and to all who have felt the particular magic and solace it offers. Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition. Los Angeles incarcerates more people than any other city in the United States, which imprisons more people than any other nation on Earth. This book explains how the City of Angels became the capital city of the world's leading incarcerator. Marshaling more than two centuries of evidence, historian Kelly Lytle Hernandez unmask how histories of native elimination, immigrant exclusion, and black

disappearance drove the rise of incarceration in Los Angeles. In this telling, which spans from the Spanish colonial era to the outbreak of the 1965 Watts Rebellion, Hernandez documents the persistent historical bond between the racial fantasies of conquest, namely its settler colonial form, and the eliminatory capacities of incarceration. But *City of Inmates* is also a chronicle of resilience and rebellion, documenting how targeted peoples and communities have always fought back. They busted out of jail, forced Supreme Court rulings, advanced revolution across bars and borders, and, as in the summer of 1965, set fire to the belly of the city. With these acts those who fought the rise of incarceration in Los Angeles altered the course of history in the city, the borderlands, and beyond. This book recounts how the dynamics of conquest met deep reservoirs of rebellion as Los Angeles became the City of Inmates, the nation's carceral core. It is a story that is far from over. Jeff Speck has dedicated his career to determining what makes cities thrive. And he has boiled it down to one key factor: walkability. The very idea of a modern metropolis evokes visions of bustling sidewalks, vital mass transit, and a vibrant, pedestrian-friendly urban core. But in the typical American city, the car is still king, and downtown is a place that's easy to drive to but often not worth arriving at. Making walkability happen is relatively easy and cheap; seeing exactly what needs to be done is the trick. In this essential new book, Speck reveals the invisible workings of the city, how simple decisions have cascading effects, and how we can all make the right choices for our communities. Bursting with sharp observations and real-world examples, giving key insight into what urban planners actually do and how places can and do change, *Walkable City* lays out a practical, necessary, and eminently achievable vision of how to make our normal American cities great again. *Latino City* explores the transformation of Lawrence, Massachusetts, into New England's first Latino-majority city. Like many industrial cities, Lawrence entered a downward economic spiral in the decades after World War II due to deindustrialization and suburbanization. The arrival of tens of thousands of Puerto Ricans and Dominicans in the late twentieth century brought new life to the struggling city, but settling in Lawrence was fraught with challenges. Facing hostility from their neighbors, exclusion from local governance, inadequate city services, and limited job prospects, Latinos fought and organized for the right to make a home in the city. In this book, Llana Barber interweaves the histories of urban crisis in U.S. cities and imperial migration from Latin America. Pushed to migrate by political and economic circumstances shaped by the long history of U.S. intervention in Latin America, poor and working-class Latinos then had to reckon with the segregation, joblessness, disinvestment, and profound stigma that plagued U.S. cities during the crisis era, particularly in the Rust Belt. For many Puerto Ricans and Dominicans, there was no "American Dream" awaiting them in Lawrence; instead,

Latinos struggled to build lives for themselves in the ruins of industrial America. People from around the world reflect on the COVID-19 pandemic and vaccine through poetry

When so much in our lives ground to a halt in the spring of 2020, no one knew how long the COVID-19 pandemic would last. After long months of shutdowns, social distancing, and worry, the first coronavirus vaccines were released in December 2020. In March 2021, the Wick Poetry Center at Kent State University and the University of Arizona Poetry Center launched the website for the Global Vaccine Poem project, inviting anyone to share experiences of the pandemic and vaccination through poetry. Dear Vaccine features selections from over 2,000 poetry submissions to the project, which come from all 50 states and 118 different countries. Internationally acclaimed author Naomi Shihab Nye, in her introduction, highlights the human dimensions found across the responses. Richard Carmona, the 17th Surgeon General of the United States, provides a foreword that contextualizes the global scope of the problem, as well as the political and public health dimensions. Making use of poetry's powerful tools to connect us across division, Dear Vaccine reminds us that medical advances alone are not enough to solve the vexing challenges of the pandemic; the arts--and poetry--have a profound and critical role to play.

Lonely Planet's bestselling *The Cities Book* is back. Fully revised and updated, it's a celebration of 200 of the world's most exciting urban destinations, beautifully photographed and packed with trip advice and recommendations from our experts - making it the perfect companion for any traveller deciding where to visit next. - Highlights and itineraries help travellers plan their perfect trip - Urban tales reveal unexpected bites of history and local culture - Discover each city's strengths, best experiences and most famous exports - Includes the top ten cities for beaches, nightlife, food and more - Lonely Planet co-founder Tony Wheeler shares his all-time favourite cities - Fully revised and updated with the best cities to visit right now

About Lonely Planet: Lonely Planet is a leading travel media company and the world's number one travel guidebook brand, providing both inspiring and trustworthy information for every kind of traveller since 1973. Over the past four decades, we've printed over 145 million guidebooks and grown a dedicated, passionate global community of travellers. You'll also find our content online, on mobile, video and in 14 languages, 12 international magazines, armchair and lifestyle books, ebooks, and more. TripAdvisor Travelers' Choice Awards 2012, 2013, 2014, 2015 and 2016 winner in Favorite Travel Guide category 'Lonely Planet guides are, quite simply, like no other.' - New York Times 'Lonely Planet. It's on everyone's bookshelves; it's in every traveller's hands. It's on mobile phones. It's on the Internet. It's everywhere, and it's telling entire generations of people how to travel the world.' - Fairfax Media (Australia)

Important Notice: The digital edition of this book may not contain all of the images found in the physical edition.

Philadelphia is a hard mistress when it comes to honoring native talent, and the city has more than its fair share of notable figures. Consider colorful politicians like Frank Rizzo and Richardson Dilworth, international celebrities like Grace Kelly, sports legends like Connie Mack, Philadelphia Museum of Art icons like Anne d Harnoncourt, or national radio personalities like Terry Gross. Business tycoons such as John Wanamaker and Russell Conwell, founder of Temple University, made many contributions to the city. Pearl Buck, author of *The Good Earth*, and Christopher Morley, America's G.K. Chesterton, created legacies of their own. Other legends like the nearly forgotten Agnes Repplier, a world-famous essayist and contemporary of Henry James, and poet Daniel Hoffman, the designated US poet laureate in 1973 1974, have helped enrich the city's literary reputation. There are Marian Anderson, Mario Lanza, and Hollywood actor Kevin Bacon, whose fame is equaled by his city planner father, Edmund. Architects like Frank Furness, Louis Kahn, and Vincent Kling helped transform the city into an international destination. And there are many notables looming outside the margins of this book, waiting for their day of discovery." Innovation districts and anchor institutions—like hospitals, universities, and technology hubs—are celebrated for their ability to drive economic growth and employment opportunities. But the benefits often fail to reach the very neighborhoods they are built in. As CEO of the Buffalo Niagara Medical Campus, Matt Enstice took a different approach. Under Matt's leadership, BNMC has supported entrepreneurship training programs and mentorship for community members, creation of a community garden, bringing together diverse groups to explore transportation solutions, and more. Fostering participation and collaboration among neighborhood leaders, foundations, and other organizations ensures that the interests of Buffalo residents are represented. Together, these groups are creating a new model for re-energizing Buffalo—a model that has applications across the United States and around the world. *City Forward* explains how BNMC works to promote a shared goal of equity among companies and institutions with often opposing motivations and intentions. When money or time is scarce, how can equitable community building remain a common priority? When interests conflict, and an institution's expansion depends upon parking or development that would infringe upon public space, how can the decision-making process maintain trust and collaboration? Offering a candid look at BNMC's setbacks and successes, along with efforts from other institutions nationwide, Enstice shares twelve strategies that innovation districts can harness to weave equity into their core work. From actively creating opportunities to listen to the community, to navigating compromise, to recruiting new partners, the book reveals unique opportunities available to create decisive, large-scale change. Critically, Enstice also offers insight about how innovation districts can speak about equity in an inclusive manner and keep

underrepresented and historically excluded voices at the decision-making table. Accessible, engaging, and packed with fresh ideas applicable to any city, this book is an invaluable resource. Institutional leadership, business owners, and professionals hoping to make equitable change within their companies and organizations will find experienced direction here. *City Forward* is a refreshing look at the brighter, more equitable futures that we can create through thoughtful and strategic collaboration—moving forward, together. Community development expert Ilana Preuss explains how local leaders can revitalize their downtowns or neighborhood main streets by bringing in and supporting small-scale manufacturing. Small-scale manufacturing businesses help create thriving places, with local business ownership opportunities and well-paying jobs that other business types can't fulfill. "Mindhunter crossed with American Gothic. This chilling story has the ghostly unease of a nightmare."—Michael Cannell, author of *Incendiary: The Psychiatrist, the Mad Bomber and the Invention of Criminal Profiling*

The pulse-pounding account of the first time in history that the FBI's Behavioral Science Unit created a psychological profile to catch a serial killer On June 25, 1973, a seven-year-old girl went missing from the Montana campground where her family was vacationing. Somebody had slit open the back of their tent and snatched her from under their noses. None of them saw or heard anything. Susie Jaeger had vanished into thin air, plucked by a shadow. The largest manhunt in Montana's history ensued, led by the FBI. As days stretched into weeks, and weeks into months, Special Agent Pete Dunbar attended a workshop at FBI Headquarters in Quantico, Virginia, led by two agents who had hatched a radical new idea: What if criminals left a psychological trail that would lead us to them? Patrick Mullany, a trained psychologist, and Howard Teten, a veteran criminologist, had created the Behavioral Science Unit to explore this new "voodoo" they called "criminal profiling." At Dunbar's request, Mullany and Teten built the FBI's first profile of an unknown subject: the UnSub who had snatched Susie Jaeger and, a few months later, a nineteen-year-old waitress. When a suspect was finally arrested, the profile fit him to a T... How does a bird experience a city? A backyard? A park? As the world has become more urban, noisier from increased traffic, and brighter from streetlights and office buildings, it has also become more dangerous for countless species of birds. Warblers become disoriented by nighttime lights and collide with buildings. Ground-feeding sparrows fall prey to feral cats. Hawks and other birds-of-prey are sickened by rat poison. These name just a few of the myriad hazards. How do our cities need to change in order to reduce the threats, often created unintentionally, that have resulted in nearly three billion birds lost in North America alone since the 1970s? In *The Bird-Friendly City*, Timothy Beatley, a longtime advocate for intertwining the built and natural environments, takes readers on a global tour of cities that

are reinventing the status quo with birds in mind. Efforts span a fascinating breadth of approaches: public education, urban planning and design, habitat restoration, architecture, art, civil disobedience, and more. Beatley shares empowering examples, including: advocates for “catios,” enclosed outdoor spaces that allow cats to enjoy backyards without being able to catch birds; a public relations campaign for vultures; and innovations in building design that balance aesthetics with preventing bird strikes. Through these changes and the others Beatley describes, it is possible to make our urban environments more welcoming to many bird species. Readers will come away motivated to implement and advocate for bird-friendly changes, with inspiring examples to draw from. Whether birds are migrating and need a temporary shelter or are taking up permanent residence in a backyard, when the environment is safer for birds, humans are happier as well. What makes a place? Rebecca Solnit reinvents the traditional atlas, searching for layers of meaning & connections of experience across San Francisco. When the people of Flint, Michigan, turned on their faucets in April 2014, the water pouring out was poisoned with lead and other toxins. Through a series of disastrous decisions, the state government had switched the city’s water supply to a source that corroded Flint’s aging lead pipes. Complaints about the foul-smelling water were dismissed: the residents of Flint, mostly poor and African American, were not seen as credible, even in matters of their own lives. It took eighteen months of activism by city residents and a band of dogged outsiders to force the state to admit that the water was poisonous. By that time, twelve people had died and Flint’s children had suffered irreparable harm. The long battle for accountability and a humane response to this man-made disaster has only just begun. In the first full account of this American tragedy, Anna Clark’s *The Poisoned City* recounts the gripping story of Flint’s poisoned water through the people who caused it, suffered from it, and exposed it. It is a chronicle of one town, but could also be about any American city, all made precarious by the neglect of infrastructure and the erosion of democratic decision making. Places like Flint are set up to fail—and for the people who live and work in them, the consequences can be fatal.

Thank you for downloading **city**. Maybe you have knowledge that, people have look hundreds times for their favorite novels like this city, but end up in infectious downloads.

Rather than enjoying a good book with a cup of tea in the afternoon, instead they cope with some malicious virus inside their desktop computer.

city is available in our digital library an online access to it is set as public so you can get it instantly. Our digital library hosts in multiple locations, allowing you to get the most less latency time to download any of our books like this one.

Kindly say, the city is universally compatible with any devices to read

Eventually, you will totally discover a further experience and finishing by spending more cash. nevertheless when? accomplish you assume that you require to get those all needs subsequent to having significantly cash? Why dont you attempt to acquire something basic in the beginning? Thats something that will guide you to understand even more on the subject of the globe, experience, some places, similar to history, amusement, and a lot more?

It is your definitely own era to play a part reviewing habit. along with guides you could enjoy now is **city** below.

Recognizing the exaggeration ways to get this books **city** is additionally useful. You have remained in right site to start getting this info. acquire the city member that we have the funds for here and check out the link.

You could buy guide city or acquire it as soon as feasible. You could quickly download this city after getting deal. So, once you require the ebook swiftly, you can straight acquire it. Its in view of that entirely easy and in view of that fats, isnt it? You have to favor to in this way of being

Getting the books **city** now is not type of challenging means. You could not lonesome going in imitation of books store or library or borrowing from your contacts to gate them. This is an completely easy means to specifically get guide by on-line. This online broadcast city can be one of the options to accompany you like having extra time.

It will not waste your time. take on me, the e-book will unconditionally vent you extra thing to read. Just invest little grow old to edit this on-line proclamation **city** as with ease as evaluation them wherever you are now.
